# ALESIA CHERNIKOVA

Postdoctoral Research Associate, Northeastern University, Boston, USA
a.chernikova@northeastern.edu — 1-781-350-0139— www.linkedin.com/in/alesia-chernikova — achernikova.github.io

## RESEARCH INTERESTS

Theory of machine learning on graphs, deep learning, network theory, responsible, secure and interpretable AI, cybersecurity.

## EDUCATION

**Northeastern University**, Boston, USA $\hspace{2cm}$ 09/2017 — 04/2024
Doctor of Philosophy in Computer Science $\hspace{2cm}$ GPA: 3.9/4.00
Advisor: Prof. Alina Oprea
Thesis: "Cyber networks resilience against adversarial attacks."

**Belarusian State University**, Minsk, Belarus $\hspace{2cm}$ 09/2009— 06/2014
Bachelor of Science in Applied Mathematics $\hspace{2cm}$ GPA: 3.8/4.00
Advisor: Prof. Vladimir Malugin
Thesis: "Development of risk management algorithms based on derivatives contracts."

## ACADEMIC EXPERIENCE

**Northeastern University, RADLAB, DK-Lab** $\hspace{2cm}$ Boston, USA
*Postdoctoral Research Associate* $\hspace{2cm}$ 05/2024 — Present

- Theoretical foundations of deep learning on graphs
- Network theory-inspired deep learning architectures
- Mechanistic Interpretability of Large Language Models

**Northeastern University, NDS2 Lab** $\hspace{2cm}$ Boston, USA
*Research Assistant* $\hspace{2cm}$ 09/2017 — 04/2024

- Introduced a new compartmental model of epidemiology to represent self-propagating malware (SPM) propagation in networks using real-world WannaCry traces. Rigorously studied the characteristics of the SPM propagation process under the homogeneous mixing assumption and on arbitrary networks.
- Designed new defense algorithms leveraging graph theory and extensively tested the behavior of existing defense techniques to improve the network robustness of large enterprise networks in the face of SPM.
- Developed a novel optimization-based framework for evasion attack algorithms that preserve possible feature dependencies to evaluate the robustness of deep learning models in constrained environments such as cybersecurity or healthcare. Evaluated the success of existing defense algorithms against the proposed attack methodology.
- Demonstrated first evasion attacks against classification and regression deep learning models in the domain of self-driving cars.

**Amazon Web Services (AWS)** $\hspace{2cm}$ Boston, USA
*Research Scientist Intern* $\hspace{2cm}$ 05/2020— 08/2020, 05/2021— 09/2021

- Created a scalable algorithm for tracing the activity in the AWS cloud represented as a heterogeneous graph to allow further research based on AWS cloud activity data.
- Developed the methodology for lateral movement detection in the AWS cloud environment using Bayesian statistics and network science perspectives.

**Belarusian State University (BSU)** $\hspace{2cm}$ Minsk, Belarus
*Undergraduate Research Assistant* $\hspace{2cm}$ 01/2012 — 12/2013

- Participated in a research project to create the methodology for estimating credit rankings of enterprises using clustering and factor analysis.
- Independently achieved and managed the results of the credit rankings estimation project for the building enterprise section.
- Collaborated in developing the package for automated calculation of credit scores based on the proposed credit rankings evaluation methodology.
- Developed novel methodologies for hedging strategies using futures and interest-rate swap contracts.

## TEACHING EXPERIENCE

**Northeastern University**                                                                                      Boston, USA
*Teaching Assistant for CS4100:Artificial Intelligence*        09/2022 — 12/2022, 09/2023 — 12/2023, 01/2023 — 04/2024

- Designed and held lectures for undergraduate and graduate students.
- Held weekly office hours to answer questions, provide support, and review course material with students.
- Graded assignments, exams, and research projects.
- Assisted professor with homework and exam preparation, proctored the exams.
- Advised students regarding research projects.

## PROFESSIONAL EXPERIENCE

**IBA Group**                                                                                                  Minsk, Belarus
*Senior Software Engineer*                                                                            11/2013 — 07/2017

- Participated in the development of a large-scale IBM GSAR web portal.
- Assisted the software architect with the efficiency and usability improvement of the portal.
- Tested software for bugs, fixed them, and maintained the portal's performance.

## PUBLICATIONS

**Robustness and Generalization in Uncertainty-Aware Message Passing Neural Networks.**     Under submission,
A. Chernikova, M. Laber, N. Sabhahit, T. Eliassi-Rad                                                        AISTATS 2026
**Uncertainty-Aware Message Passing Neural Networks.**     New Perspectives in Advancing Graph Machine Learning,
A. Chernikova, M. Laber, N. Sabhahit, T. Eliassi-Rad                                                 NeurIPS workshop 2025
**Modeling Self-Propagating Malware with Epidemiological Models.**          Applied Network Science 2023
A. Chernikova, N. Gozzi, S. Boboila, N. Perra, T. Eliassi-Rad, and A. Oprea.
**Cyber Network Resilience against Self-Propagating Malware Attacks.**                          ESORICS 2022
A. Chernikova, N. Gozzi, S. Boboila, N. Perra, P. Angadi, J. Loughner, M. Wilden, T. Eliassi-Rad, and A. Oprea.
**Fence: Feasible Evasion Attacks on Neural Networks in Constrained Environments.**        ACM TOPS 2022
A. Chernikova and A. Oprea.
**Are Self-Driving Cars Secure?**                                         SafeThings IEEE S&P Workshop 2019
**Evasion Attacks against Deep Neural Networks for Steering Angle Prediction.**
A. Chernikova, A. Oprea, C. Nita-Rotaru and BG. Kim
**Hedging Algorithms Based on Interest-rate Swaps.**                                       BSU Conference 2013
A. Chernikova and V. Malugin.

## TALKS

"**Modeling Self-propagating Malware with Compartmental Models of Epidemiology.**"              JMM, 2025
"**Cybernetwork Resilience against Self-Propagating Malware Attacks.**"          Network Science Institute, 2024
"**Cybernetwork Resilience against Self-Propagating Malware Attacks.**"              DoD SERDP Workshop, 2024
"**Towards Resilient Cybernetworks against Adversarial Attacks.**"                   Amazon Web Services, 2023
"**Cybernetwork Resilience against Self-Propagating Malware Attacks.**"                        ESORICS, 2022
"**Feasible Evasion Attacks in Constrained Environments.**"                                  CRA Seminar, 2022
"**Graph-based Statistical Detection of Anomalous Role Assumption Events.**"         Amazon Web Services, 2020
"**Feasible Evasion Attacks on Neural Networks in Constrained Environments.**"             ARL Meeting, 2020
"**Evasion Attacks against Deep Neural Networks for Steering Angle Prediction.**"      SafeThings Workshop, 2019

Reviewer                                                                      ACM TOPS, IEEE Transactions on Privacy
Technical Program Committee            AISTATS'26, IEEE S&P'26, IEEE S&P'25, IEEE MILCOM AI for Cyber'23

## AWARDS

**IAIFI Summer School Best Project Award**                                                                2025
**IEEE S&P and GREPSEC Travel Grant**                                                                     2019
**Khoury College of Computer Science Fellowship**                                                 2017 — 2018
**National Bank of the Republic of Belarus Merit Scholarship**                                    2013 — 2014
**Belarusian State University Excellence Merit Scholarship**                                       2012 — 2014

## SKILLS

- **Programming:** Python, Java, Scala, Javascript, C/C++
- **Frameworks and Libraries:** PyTorch, Tensorflow, Keras, Spark
